University of Denver ◊ Dec 2018

Skills/Tools

Projects

Puerto Rico

Disaster Recovery Solution ◊ Feb 2020 — Present

Iteratively design features for a disaster recovery platform utilized to manage and deliver disaster relief funding to Puerto Rico. Drive UX working sessions and road mapping to ensure an optimal product based in research and collaboration is delivered. Engage daily with Product Owners, Business Analysts, and Scrum Masters to coordinate and align on project vision and delivery.

Ares View

Interactive Map of Mars ◊ Nov 2016 — Present

Design and develop a web-based interactive map application of the planet Mars. Conduct regular research and analysis of similar products to identify opportunities for an enhanced experience intended for educational purposes. Coordinate and conduct user testing to inform research and subsequent product iterations.

Connect for Health Colorado

New Eligibility System ◊ Jul 2018 — Nov 2018

Enhanced and resolved user interface patterns as a front end developer for a B2C application for end users to determine eligibility for healthcare under the Affordable Care Act. Collaborated with an interdisciplinary development team to deliver a product that satisfied data architecture and management as well as UX best practices and accessibility.
